Pharmacists

Consider the challenge and opportunity of a Canadian Armed Forces Career.

The Canadian Forces offer you a career as committed to excellence as you are.

We need graduate pharmacists licensed to practice in Canada; pharmacists who want to work with modern equipment in major hospitals, clinics and field medical units across Canada or overseas, pharmacists who want a secure future, and post-graduate training opportunities. Pharmacists who want to get the most out of their career. A career with a difference.

Opportunities still exist under the subsidized University program for male or female students who have been accepted for, or are currently enrolled in a Bachelor of Science (Pharmacy) program.

Choose a Career, Live the Adventure.

For more information, visit your nearest recruiting centre or call collect — we're in the Yellow Pages™ under Recruiting.
